

Your wish has come true!

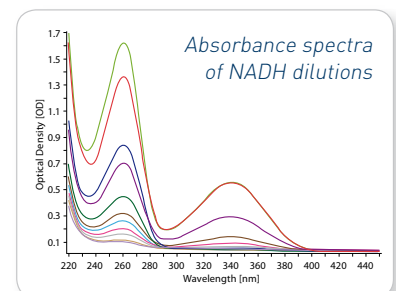

## New PHERAstar FS Microplate Reader - the Gold Standard for High-Throughput Screening

High-end and unique features include:

- Tandem Technology - Spectrometer / filter based detection
- Ultra fast UV/Vis spectrometer for full absorbance spectra
- Fluorescence Intensity, TRF, FP, Luminescence
- Dedicated UV-laser for TR-FRET measurements
- Advanced HTRF® performance
- AlphaScreen® laser
- On-board reagent injection for precise kinetic measurements
- Advanced top and bottom reading
- High-resolution cell layer scanning
- All new MARS data analysis software
